HEALTH RESOURCES AND SERVICES ADMINISTRATION

Program Announcement for a Cooperative Agreement for the Development and Enhancement of Health Promotion and Disease Prevention Curriculum Components Within Health Professions Education

The Health Resources and Services Administration (HRSA) announces the awarding of a single source cooperative agreement to the Association of Teachers of Preventive Medicine (ATPM) to plan for the development and enhancement of Health Promotion and Disease Prevention (HP/DP) curriculum components within health professions education. This activity will be supported under the authority of Title III, Section 301, of the Public Health Service Act. Five years of support are proposed beginning in fiscal year 1997. An initial award of \$262,301 will be used for the development of vaccine benefit-risk curriculum for health care professionals.

The project will: (1) Enhance the integration of HP/DP within existing health professions primary care curriculum; (2) identify and develop standards, guidelines, competencies, and training models that address HP/DP curricula; (3) serve as a resource for professional organizations, specialty societies, and academic units in developing a program of education and training in preventive medicine; and (4) explore project ideas regarding the instruction, practice and research in preventive medicine which respond to the national objectives of *Healthy People 2000*. The ATPM was chosen because it is the only professional

organization solely committed to advancing the teaching of HP/DP in the clinical specialties. It has an established membership of professionals which include teachers, researchers, practitioners, and administrators of multiple disciplines and medical specialties located in schools of medicine, academic health centers, schools of public health, accredited graduate medical education programs, nursing schools and various practice settings. It is uniquely structured to access current HP/DP instruction for health professionals of multiple disciplines and to influence the development of essential information as required. The Association also has developed and provided access to preventive medicine teaching and curriculum materials for both pre-service health professions education and continuing education. Many of these materials are proprietary in nature.

Federal Involvement

The Cooperative Agreement mechanism is being used for this project to allow for substantial Federal programmatic involvement with the planning, development, administration, and evaluation of the proposed projects.
